

***Industry Era* Names SenecaGlobal A 2018 Top Ten Technology Solution Provider**

OAK BROOK, Ill., November 1, 2018 – [SenecaGlobal](#), a leader in outsourced software product development and cloud services, is making news again earning a top spot as one of the ten best technology solutions providers in the country according to the digital magazine, *Industry Era*, an interactive, community destination for C-level executives and other high-level IT executives in North America and Asia.

The recognition comes on the heels of a July announcement by *The Great Place to Work Institute* that deemed SenecaGlobal [one of the 50 best companies to work for in India](#).

“Eleven years ago, SenecaGlobal opened its doors to offer smart, cost-effective IT expertise to clients that exceeded their expectations in a straightforward way,” said President and Co-Founder Ed Szofer. “Our plan was, and continues to be simple: Match the right strategic business experts with highly motivated technologists and satisfy clients by meeting their needs, on time and on budget.”

Today, SenecaGlobal provides a range of software services from technical advisory to 24/7 IT help desk support including:

- Enterprise Cloud and Managed Services
- Software Product Development
- Application Software Development, and

Supports technologies including:

- Microsoft.NET
- IBMi
- Open Source
- Oracle Technologies
- Android & iOS
- Internet of Things, and
- Amazon Web Services.

“Reinvesting profits into the company, especially into the people, in terms of skills development, career enhancement opportunities and talent acquisition helped us create a healthy culture that differentiates SenecaGlobal from the large, traditional, IT outsourcing firms,” added Managing Director and Co-founder, Rao Tummalapalli. “Our employees are client-centric, and we are employee-focused, which results in the motivated teams that are agile and able to respond to challenging requirements. Our organic growth demonstrates the proof of our model.”
